Mast x2

Mast base x2

Insulators x4

Arms x2

Auto transformer wire mount x2

Weight x2

Wire clamp x2

Dear Customer

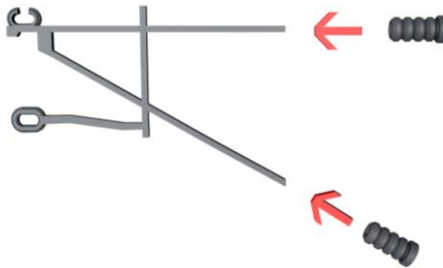

Thank you for your purchase and interest in our OO Gauge OLE Frames.

It has been designed to fit together with ease and be wired for a more dense / busy look.

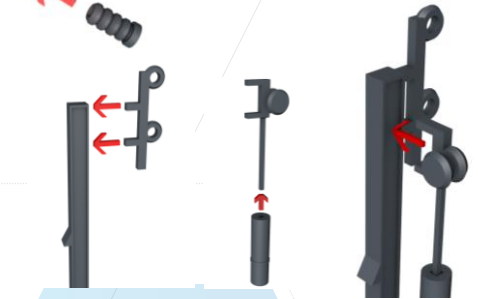

Please review the features and see the guide on how to setup the OLE Frames.

ASSEMBLY INSTRUCTIONS.

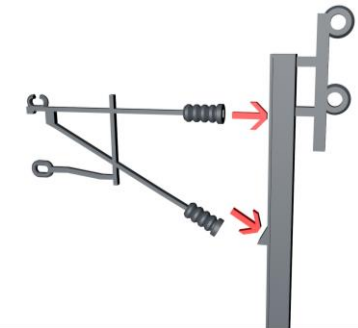

- 1) Mount and glue H Frame mast and base as shown in image on left.
- 2) Add the insulators to the arms as shown below.

- 3) Add the auto transformer wire mount as shown in on the right. (This is optional). Then add the weight to the wire clamp as shown in the second image on the right and glue the wire clamp to the mast as shown in far-right image.

- 4) Align and glue the Cantilever Arms to the H Frame mast as shown in the bottom right.

** Ensure you have the correct height for your train traffic to fit under. – Ensure you have the Cantilever aligned over your track.

Please note; This product is not designed to be adjustable afterwards. It is a 'position once' OLE frame.

It would be greatly appreciated if you left feedback, this will allow LitPrints to grow and invent new products to improve life quality or aesthetics.
